

Technology Trends Dashboard — Decision Snapshot

Purpose

Turn a large developer survey into clear signals for hiring, training, and technology planning.

What was tricky

Some survey answers include multiple choices in one field, so simple counting can mislead.

What I did

I cleaned the data, counted technologies in a consistent way, and built dashboards that show current use, future interest, and key demographics.

How to use this

Use the results to prioritise core skills, make selective bets on new tools, and avoid decisions based on hype.

Repo / methods / visuals:

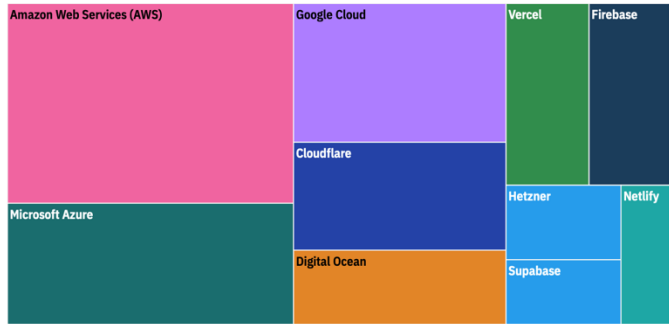

[Project 02 Data Visualization Python Developer Survey](#)

Future Technology Trend

Top 10 Programming Languages Respondents Want to Work With

Top 10 Platform Respondents Want to Work With

Top 10 Databases Respondents Want to Work With

Top 10 Web Frameworks Respondents Want to Work With

Current Technology Usage

Top 10 Programming Languages Respondents Worked With

Top 10 Databases Respondents Worked With

Top 10 Platforms Respondents Worked With

Top 10 Web Frameworks Respondents Worked With

Demographics

Respondent Distribution by Age

Respondent Count by Country

Respondent Distribution by Formal Education Level

Respondent Count by Age Group and Education Level
